ESX Serves As Launch Pad for Important New Security Products

Breakthroughs in Video Surveillance, Intrusion and Fire Detection, Access Control, Central Station Technology and Services Debut at Industry-Owned Event in Baltimore

Electronic Security Expo 2009

MANSFIELD, Mass. -- (BUSINESS WIRE)--The Electronic Security Expo is becoming an important venue for the introduction of new products and services. More and more manufacturers and services providers understand that ESX offers products with key innovations and business impact for installing, integrating and monitoring companies the perfect audience and environment for introduction.

Below are eight exciting new products and services debuting at ESX. These products were identified as "launching at ESX" by their makers, when submitted for consideration in the ESX Maximum Impact Awards and for inclusion in the ESX Product & Training Preview Brochure. Dozens of other suppliers are showcasing new products and services at ESX as well. For complete information on ESX exhibitors, visit www.esxweb.com.

Videofied - Booth #1208 - www.videofied.com
Product Name: Videofied XL Intrusion Alarm. 2-way voice over GSM
Product Description: Videofied XL, a new price paradigm for "unplugged" residential wireless video alarm system. The basic kit includes 2-way voice over cell, integrated video camera/sensor, 2 contacts and proximity card arming. With the new Videofied XL, video comes free. Increase RMR with simple wireless video verification over cell.

VES Fire Detection Systems - Booth #924 - www.ves-network.com
Product Name: VES eLAN RS Single Loop Addressable Panel
Product Description: The New VES eLAN Single Loop RS control Panel provides advanced technology. This new panel provides the performance of an analog addressable system in a cost effective single loop that can be up-graded from 127 points to 254 points. The eLAN™ Fire Alarm System offers easy-to-use remote programming and reporting access.
Videofied - RSI Video Technologies

Kaba Access Control - Booth #1027 - www.kaba-access.com
Product Name: E-Plex 2000
Product Description: Kaba's E-Plex 2000 offers an economical electronic access control solution that combines strength, simplicity and reliability. The lock has 100 access codes, and is programmed at the lock keypad without using any software. Installation is quick and easy as there are no wires to, or through the door, eliminating the risk of damage from pinched wires.

Product Name: LearnLok Series™
Product Description: Kaba's E-Plex LearnLok™ series provides card access without wires, software, or computers. This is the perfect solution for simple card access installations, or to add additional doors to an existing system at less cost. The LearnLok series is available to read various card technologies including 125 kHz PROX, FIPS 201 (PIV) credentials, and DESFire cards. It can easily migrate to a software managed system.

Product Name: Single Access Controller (SAC)
Product Description: Kaba's E-Plex Stand-Alone Access Controller (SAC) is a flexible access control solution offering PIN and/or card access (various card technologies including, PROX, PIV and DESFire). The E-Plex SAC gives online-type functionality in a stand-alone, easy to install reader housing—with the ability to plug directly into any new or existing fire alarm and security system. It can be used with, or without, software.

Honeywell Security - Booth #1515 - www.honeywell.com
Product Name: Total Connect
Product Description: The Total Connect suite of digital communications services—a unique offering that lets consumers utilize the Internet, PDAs, cell phones, video cameras and more to stay connected to their homes and businesses—is an ideal way for dealers to increase RMR while addressing the challenges of VoIP and cell phone-only residences and businesses.

DICE Corporation - Booth #1133 - www.dicecorp.com
Product Name: DICE Quantum Operator
Product Description: DICE Quantum Operator provides central stations and dispatch centers with the ability to automate both inbound and outbound calling features that would normally require operator intervention. The system uses the latest hardware and software technology to seamlessly integrate with the DICE monitoring environment, providing the central station with a valuable tool to reduce the strain placed on the dispatch center for menial tasks.

Crest Electronics, Inc. - Booth #1221 - www.crestelectronics.com
Product Name: Crest's new CP-46PS-N Hi-Res Pixim Environmental Vandal Dome
Product Description: One of ten cameras in our new zIP™ line, the CP-46PS-N features Pixim's Digital Pixel System® technology, 480 lines of resolution, 0.02 lux in B&W mode, a
