

BoldTrak
GPS Management
Manitou Integration

Asset protection and management like never before

What is BoldTrak?

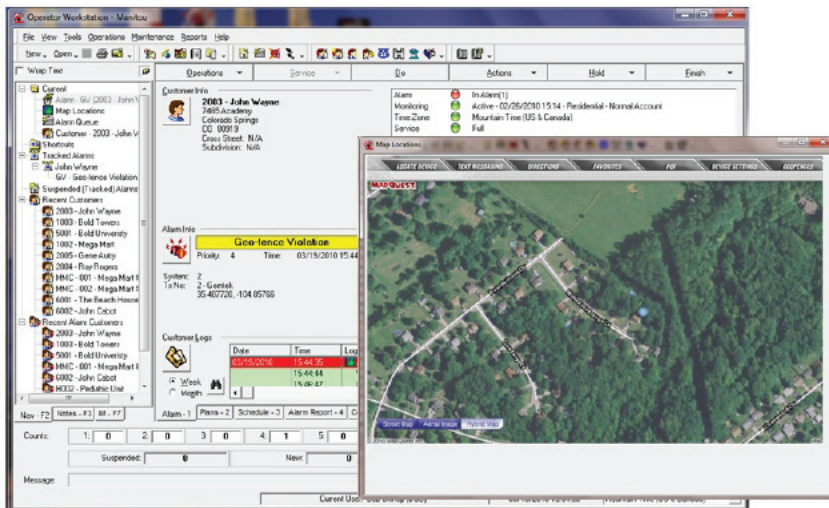

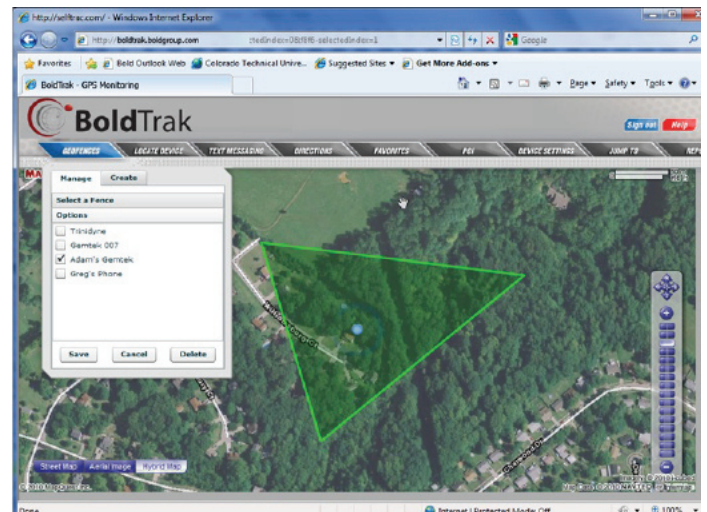

BoldTrak integrates with the Manitou alarm automation software to provide a robust and scalable tracking platform that can integrate with GPS tracking or emergency device, allowing your business to provide services like asset protection, fleet/vehicle tracking and remote emergency response.

What sets BoldTrak apart?

BoldTrak is a ground breaking GPS tracking system that uses a true PSAP database, allowing your business to confidently dispatch the proper authority. An intuitive web interface allows end users to make their own changes, and a unique SaaS or deployed option offers the lowest entrance cost available, while still offering a robust GPS solution for your business.

BoldTrak Core Features:

- **Device Independent** - Works with many different GPS devices from loneworker pendants to fleet units
- **Online User Interface** - Log in to track your devices or make edits from anywhere
- **MapQuest Mapping Interface** - Familiar screens and actions reduce training time
- **GeoFence** - Create GeoFence boundaries of and shape and size in real time without leaving the application
- **Manitou Integration** - Alarms generate directly into Manitou allowing for simple tracking and handling of each alarm

• Fully integrated with Manitou
• Scalable to meet your needs
• Hosted or deployed options
• Works with most GPS devices
• Mobile PERS capable
